Draw it yourself!

Nature, an amazing source of inspiration. Plants and trees create shade in a unique way, for themselves and for their environment. This is why nature is the starting point for the Rimbou range. The Rimbou enables you to enjoy the shade on your lounge chair, in a classy way, the entire day.

The Paraflex parasol system offers you an unprecedented flexibility in the field of shade creation. Thanks to a parasol on a flexible side pole you can create a maximum of shade. The system offers almost unlimited possibilities, from the ingenious *wall fastening* to the unique *multi-parasol pole fastening*.
